168	Ford Taurus	3.6%

Methodology

iSeeCars.com analyzed over 395,000 used cars from model year 2005, sold between January 1 and July 30, 2015. For each model, the number of cars sold by the original owner (based on Carfax data) was tallied and expressed as a percentage of the total number of cars sold. Original owner cars are cars that were bought as new by the owner. Models with fewer than 50 original-owner cars were excluded from further analysis. The models were then ranked by the original-owner percentage.

About iSeeCars.com

iSeeCars.com is a car search engine that helps consumers find the best deal by providing key insights and analysis about each used car. The proprietary iSeeCars.com algorithm ranks cars by calculating an overall score based on analysis of the car's condition, history, negotiability, price and the dealer. Based in the Boston area, iSeeCars.com was founded by former TripAdvisor and SAP developers and executives determined to improve the used car shopping experience for consumers.
